

Jordan Smith

Full Stack Developer

Austin, TX • jordan.smith@email.com • github.com/jsmith-dev • jordansmith.dev

SUMMARY

Passionate Full Stack Developer with a strong foundation in modern web technologies and a focus on building responsive, user-centric applications. Recently graduated with a B.S. in Software Engineering and hands-on experience through internships and community-driven open-source projects.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, CSS3/Sass

Frontend: React, Redux, Next.js, Tailwind CSS, Material UI

Backend: Node.js, Express, REST APIs, PostgreSQL, MongoDB

Tools: Git, Docker, Jest, Postman, Vercel, Firebase

EXPERIENCE

Software Engineering Intern | WebFlow Inc.

May 2023 – Aug 2023

- Developed a reusable React component library used across 3 internal tools, increasing UI consistency.
- Collaborated on the migration of a legacy dashboard to Next.js, resulting in a 30% improvement in page load speed.
- Identified and resolved 20+ critical bugs during the QA phase of a major product release.

PROJECTS

ShopEase – E-Commerce Platform

Personal Project

Built a full-featured online store using the MERN stack. Features include user authentication (JWT), product search/filtering, and Stripe integration for payments.

TaskPulse – Collaborative Task Manager

Academic Project

Designed a real-time project management tool using Socket.io and React. Enabled multi-user live editing and instant notifications for task updates.

EDUCATION

B.S. in Software Engineering | State University

Class of 2024

GPA: 3.8/4.0 | Relevant Coursework: Data Structures & Algorithms, Database Management, Web Architecture.
