

Sarah Jenkins

Seattle, WA | sarah.jenkins.eng@email.com | github.com/sjenkins-backend

Senior Backend Engineer with 8+ years of experience specializing in distributed systems, microservices, and cloud-native infrastructure. Passionate about building robust, secure, and highly available systems using Go and Python.

EXPERIENCE

Lead Backend Engineer | CloudScale Systems

Mar 2019 – Present

- Designed and implemented a distributed task processing engine in Go, handling 1M+ jobs per hour.
- Managed Kubernetes clusters across multiple AWS regions, achieving 99.99% uptime for core services.
- Automated infrastructure provisioning using Terraform and Ansible, reducing environment setup time from days to minutes.
- Implemented OAuth2 and JWT-based authentication services for a suite of 15+ microservices.

Senior Software Engineer | FinTech Innovations

July 2015 – Feb 2019

- Architected a secure data encryption pipeline for sensitive financial transactions using Python and AWS KMS.
- Optimized legacy Python/Django services, improving throughput by 3x through asynchronous processing with Celery and RabbitMQ.
- Collaborated with security teams to conduct regular penetration testing and vulnerability remediation.

CORE COMPETENCIES

Languages: Go, Python, Java, SQL, Bash

Backend: Microservices, gRPC, RESTful APIs, Kafka, Redis, Elasticsearch

Infrastructure: AWS (EKS, RDS, Lambda), Kubernetes, Docker, Terraform, CI/CD (GitLab)

EDUCATION & CERTIFICATIONS

M.S. in Computer Science | Georgia Institute of Technology

AWS Certified Solutions Architect – Professional
